Subsaharan Africa is generally considered one of the most vulnerable regions to the impacts of climate change, and 33 of 48 eligible LDCs eligible for LDCF funding are found in this region.

LDCF/SCCF has supported mainstreaming climate change adaptation into key development sectors such as agriculture, water management, health, disaster risk management, infrastructure and coastal zone management.

Africa receives 56% of the approved LDCF funding and 26% of the approved SCCF funding.

LDCF IN AFRICA – CURRENT STATUS

- 28 African countries have received LDCF support.
- 53 projects have been funded
- $222 M total funding in the region
- Including one programmatic approach “Sahel and West Africa Program in Support of the Great Green Wall Initiative”
- Somalia – proposal for NAPA preparation recently approved
- Equatorial Guinea – Yet to prepare a NAPA
- Cape Verde graduated from LDC status
LDCF Support Towards Development Sectors in Africa

- **Food and Agriculture**: 36.4%
- **Early Warning System**: 0.1%
- **Water Resources**: 9.5%
- **Coastal Management**: 3.7%
- **Disaster Risk Management**: 3.0%
- **Ecosystem Management**: 29.8%
- **Tourism**: 0.0%
- **Health**: 0.0%

Funding Gaps and Opportunities

- Eligible LDCs without NAPA implementation projects (3): Angola, Eritrea and Madagascar
- Eligible LDCs with only one project approved to date (11): Burundi, Central African Republic, Chad, Congo DR, Djibouti, Guinea-Bissau, Mauritania, Mozambique, Senegal, Sudan, Uganda
- Eligible LDCs without NAPA (2): Somalia and Equatorial Guinea
- LDCs yet to ratify UNFCCC: South Sudan
- Non-LDCs without SCCF projects: Tunisia, Cote d'Ivoire, Gabon, Cameroon, Congo, Namibia, Botswana, Mauritius, Seychelles
Senegal: “Climate Change Adaptation Project in the Areas of Watershed Management and Water Retention” (LDCF grant: $5.1 M)

Objective: To increase resilience of agricultural production systems and associated value chains to climate impacts in the water sector of the Peanut Basin area by securing the supply and availability of water

Project Activities:
- Water harvesting and watershed management
- Water conservation and efficient irrigation
- Capacity building, awareness raising, and knowledge management
Mozambique: “Integrating Climate Change into the Management of Priority Health Risks” (SCCF grant: $1.8 M)

Objective: Enhancing food security and the capacity to adapt to climate change in agricultural and pastoral systems

Project Activities:
- Set up demonstration fields with drought-resistant crops
- Open and clean dams, lagoons and channels and build concrete water harvesting and storing systems that have already been tested in semi-arid regions of Brazil
- Training on the impact of climate change and adaptation measures
Tanzania: “Addressing Adaptation to Climate Change in Productive Coastal Zone” (LDCF grant: $3.4 M)

Objective: To reduce coastal zone-specific vulnerabilities, including relocating coastal shallow water wells, restoring mangroves, and implementing physical infrastructures to address sea-level rise, and extreme weather events.

Project Activities:
- Restoring mangroves, protecting water resources, and strengthening coastal infrastructures and assets
- Capacity building of district authorities, CBOs, etc. in resilient ICZM
South Africa: “Reducing Disaster Risks from Wildland Fire Hazard Associated with Climate Change” (SCCF grant: $3.6 M)

Objective: to more effectively manage the risks associated with an anticipated increase in impacts of climate-induced wildland fires in the Fynbos Biome

Project Activities:

- Improving adaptive capacity of Fire Protection Associations and communities at risk
- Adopting Integrated Fire Management (IFM) as a strategic adaptation approach
- Improving the information and decision-support tools required to support the implementation of IFM
- Developing and implementing a suite of incentives to encourage a behavioural change in landowners and communities at risk
Ghana: “Integrating Climate Change into the Management of Priority Health Risks” (SCCF grant: $1.8 M)

Objective: To identify, implement, monitor, and evaluate adaptation measures to reduce burdens of malaria, diarrheal diseases, and meningococcal meningitis.

Project Activities:

- Improve national and local health sector capacity to plan and manage CC-induced diseases
- Establish cross-sectoral coordination mechanisms to support CC-resilient health policy
- Disseminate best practices and lessons learned
End of Session 3
