AFRICA TO AFRICA INVESTMENT
A FIRST LOOK
IMAGES OF AFRICAN INVESTMENT

An office worker picks up pre-ordered groceries at a recently opened leisure park.

A student puts on a hard hat to visit a new industrial plant as part of a training day.

A trader talks on his phone before the regional stock exchange opens for the day.

A worker switches on the power of a factory where local goods are being processed.

A farmer harvests the crop for the first-time using the latest agricultural machinery.

A small firm loads crates onto trucks that will travel along new roads to consumers.

A family calls to share a virtual tour of their first home in a newly built complex.

A construction manager checks the blueprint at the site of a new healthcare centre.

A young person checks their bank account online at a new retail complex in the city.

An entrepreneur is mid-flight to another capital to meet a local business partner.

A farmer harvests the crop for the first-time using the latest agricultural machinery.

A family calls to share a virtual tour of their first home in a newly built complex.
Investing in Africa is in the headlines. There is a growing consensus on the need for more African companies to invest in the continent at a time when global FDI flows are falling and an uncertain international landscape prevails. Investment can be shorthand for economic development: more capital and connectivity, more projects and prosperity, more employment and earnings. Yet, do the results investors reap outweigh the risks of investing?

What are the realities companies across Africa face when investing in the continent? Are trends emerging about how Africa’s companies invest and how African policymakers can bring it about? What is next for Africa-to-Africa investment?

The African Development Bank’s preliminary report ‘Africa-to-Africa Investment: a first look’ recognizes the valuable research that already exists on foreign direct investment in Africa, thanks to the efforts of a range of international organizations and global industry.

This report, with its closer look at intra-African investments, aims to highlight the results and lessons of African companies that have successfully expanded their African footprint. Sincere appreciation goes to the eight leading African companies that shared rich and insightful lessons on their own experiences and made valuable recommendations to businesses and policymakers on how to help make Africa-to-Africa investment a reality.

Special thanks go to Abdu Mukhtar, Director, Industrial and Trade Development Department, who provided leadership and direction in the preparation of the report, and to Jean-Guy Afrika, who led the team. Warm acknowledgment also goes to the report’s contributors, including Moono Mupotola, Gerald Ajumbo and Andoh Mensah, and to Marie Anitha Jaotody for her support.

Special recognition goes to Elena Immambocus for writing the report, building on the framework developed by international advisory firm, Konfidants, and to Peggy King Cointepas for the design and graphics.

The African Development Bank is keen to support intra-African investment, not only by financing new investments, but also by contributing to a more friendly investment climate and truly open borders across the continent.

Pierre Guislain
Vice President, Private Sector, Infrastructure and Industrialization
African Development Bank
The African Development Bank is championing investment across Africa as part of unlocking the continent’s potential in five priority areas – the High 5s. These headline goals aim to transform Africa’s prosperity long-term and scale up development outcomes by working on issues from energy, agriculture and industry to markets, jobs, skills and quality of life.

**The High 5 goals to 2025** recognize the critical gaps that hold countries and communities back Africa-wide and line up closely to support the UN’s Sustainable Development Goals (SDGs). The building momentum around delivering the High 5s and the SDGs is important. Bringing the private sector into the dialogue, alongside policymakers and the development community, makes sure that investors are connected with opportunities that generate high returns, build lasting partnerships and impact positively on people and places across Africa.

The High 5s are strongly interlinked with Africa-to-Africa investment; progress made in each priority area will in turn attract more investors to cross the continent’s borders. Infrastructure comes out as a top concern for African companies who are investing in the region, alongside access to stable, affordable electricity supplies to power their business. Strong public-private partnerships are another factor influencing investment decisions and the availability of incentives such as special economic zones. A workforce with labour market skills is also a big plus to encourage investors. At the same time the High 5s point investors to opportunities to invest in upcoming sectors, such as agribusiness and healthcare, which will help to feed and provide quality of life for Africa’s growing population.

---

**LIGHT UP & POWER AFRICA**
Goal to 2025 - Universal access to electricity
- +162 GW electricity generated
- +130 million on-grid connections
- +75 million off-grid connections

**FEED AFRICA**
Goal to 2025 - Agricultural transformation
- +150m people adequately fed
- +100m people lifted out of poverty
- +190m hectares with restored productivity

**INDUSTRIALIZE AFRICA**
Goal to 2025 - Economic diversification
- Industrial contribution to GDP increased by 130%
- 35 special economic zones supported
- 30 PPPs developed & strengthened

**INTEGRATE AFRICA**
Goal to 2025 - Regional market
- Building regional infrastructure
- Boosting intra-African trade & investment
- Facilitating movement of people across borders

**IMPROVE THE QUALITY OF LIFE FOR THE PEOPLE OF AFRICA**
Goal to 2025 - Access to social & economic opportunities
- Creating 80 million jobs
- Building critical skills
- Improving access to water & sanitation
- Strengthening health systems

AFRICA-TO-AFRICA INVESTMENT: A FIRST LOOK

‘Africa-to-Africa Investment: a first look’ aims to take the conversation on investing in the continent one step further. It is the first attempt to showcase how African companies and policymakers are driving investments in Africa and what more can be done moving ahead.

To start to plug the data gap on intra-African investments, the report takes a look at the dynamics behind African investment from the point of view of leading African companies. It shares key lessons and experiences to offer practical solutions for the region’s investors.

The report features case stories from eight publicly listed or privately owned African companies operating in a range of sectors. Each has a significant African footprint — registered and operational in at least one country outside of the company’s home base. The companies represent consumer services, finance, industry, media and diversified portfolios and investment from across North Africa (Morocco), West Africa (Nigeria, Togo), East and Central Africa (Ethiopia, Kenya) and Southern Africa (Mauritius, South Africa).

The companies in the report were selected from a potential pool of 300 African companies. Detailed criteria were developed, which included variables such as geographic and industry distribution, the size of capital investments and number of employees outside a company’s home base.

The goal is to profile more companies and insights in future editions and to track fresh data and trends on Africa-to-Africa investment over time. Alongside the case stories, an African investors’ index of the businesses shaping Africa’s investment landscape is in the pipeline.

The first Africa Investment Forum, convened by the African Development Bank, will also take place in Johannesburg from November 7-9 2018 to match investors with investment opportunities in the continent.

Definitions

Foreign direct investment (FDI): The objective of establishing a lasting interest by a resident enterprise in one economy (direct investor) in an enterprise (direct investment enterprise) that is resident in an economy other than that of the direct investor.²

Africa-to-Africa investment: An investment made by an African enterprise in an African country other than its home country.

² OECD Benchmark Definition of Foreign Direct Investment 2008 (OECD)
“African companies that invest in Africa have clear confidence in her long-term growth potential; they are at the cutting edge of their industries and, moreover, are capitalizing on their African context to generate higher returns. The highlights, lessons and checklist solutions in this report signpost what it will take for other companies and policymakers to promote an ‘invest with impact’ approach in Africa.”
FOREWORD

Foreign direct investment to Africa fluctuated over the last 5 years, reaching a high of USD74 billion in 2013 and gradually falling to USD41 billion in 2017. Global flows of foreign direct investment also contracted over the last two years, falling by a sharp 23 per cent in 2017. With a very modest recovery predicted for 2018, this downward trend is a long-term concern for Africa as foreign direct investment is critical to accelerate industrialization and sustainable development. To help reverse this trend, the African Development Bank is establishing the Africa Investment Forum as a platform to facilitate project development and financing, with an inaugural meeting in Johannesburg in November 2018.

The current volatile global environment underscores the importance for Africa to reduce its dependence on extra-continental inflows and to promote intra-regional investment alongside international investment. Data on intra-regional investment is scarce, but our latest findings indicate that the overall trend is positive. Indeed, between 2006 and 2016, intra-African greenfield investments grew from USD4 billion to USD10 billion, while the number of intra-regional mergers and acquisitions doubled, growing from 238 deals in 2006 to more than 418 in 2016.

This Africa-to-Africa (A2A) Investment Report aims to take the debate on intra-regional investment a step further by profiling some of Africa’s investment champions. Company case stories covering industry, finance, media, consumer services and diversified portfolios across Africa show that the continent’s investment opportunities often outweigh the obstacles.

African companies that invest in Africa have clear confidence in her long-term growth potential; they are at the cutting edge of their industries and are capitalizing on their knowledge of local markets to generate higher returns. By tailoring flexible business models, harnessing local talent and skills and building win-win partnerships, a growing number of companies are expanding into the continent, with substantial results and impact.

The African Union’s Agenda 2063 calls for increased focus on intra-regional investment as a way to accelerate regional integration and boost economic growth and competitiveness. Driving intra-regional investment is also a critical dimension of implementing the Bank’s High 5 priorities to ‘Light up and Power Africa,’ ‘Feed Africa,’ ‘Industrialize Africa,’ ‘Integrate Africa,’ and ‘Improve the Quality of Life for the People of Africa.’

The highlights, lessons and solutions provided in this report will inspire other companies and policymakers to promote both foreign and intra-regional investments. They add up to a powerful picture that, together with the Bank’s upcoming Africa Investment Forum, will help realize the region's untapped investment potential. Join us as we go forward on Africa’s own investment journey: it is well worth the ride.

Akinwumi A. Adesina  
President  
African Development Bank Group
AGENDA 2063: SELECTED EXTRACTS

ASPIRATION 2.
An integrated continent, politically united, based on the ideals of Pan-Africanism and the vision of Africa’s Renaissance

24. Africa shall be a continent where the free movement of people, capital, goods and services will result in significant increases in trade and investments amongst African countries rising to unprecedented levels, and in the strengthening of Africa’s place in global trade.

25. By 2063, the necessary infrastructure will be in place to support Africa’s accelerated integration and growth, technological transformation, trade and development.

A Pan-African High Speed Train Network will connect all the major cities/capitals of the continent, with adjacent highways and pipelines for gas, oil, water, as well as ICT Broadband cables and other infrastructure.

This will be a catalyst for manufacturing, skills development, technology, research and development, integration and intra-African trade, investments and tourism.

72. We hereby adopt Agenda 2063, as a collective vision and roadmap for the next fifty years and therefore commit to speed-up actions to:

d. Transform, grow and industrialise our economies through beneficiation and value addition of natural resources:

Implementing the African Industrial Development Action Plan, the African Mining Vision at country, regional and continental level, in particular fast-tracking the establishment of the Centre for African Mineral Development;

Implementing joint cross-border investments to exploit shared natural resources;

Promoting social dialogue, sectoral and productivity plans and regional and commodity value chains to support the implementation of industrial policies at all levels, with focus on SMMEs and Agribusinesses;

Establishing Commodity Exchanges for strategic African products;

Developing strategies to grow the African Blue/ocean and green economies;

Developing the African private sector through engagement and a conducive climate, fostering Pan-African businesses through the growth of regional manufacturing hubs and scaled up intra-Africa trade;

Enhancing the Productivity Agenda for Africa, as an essential engine for industrialization, progressively enhancing the competitiveness of the continent in the global economy; and

Promoting macro-economic policies that facilitate growth, employment creation, investments and industrialization.

“It is well recognised that investment, whether it is domestic inward investment or foreign direct investment (FDI), targeted at specific strategic sectors, has the potential to enable Africa to leapfrog the development ladder... Deepening regional integration is also an important aspect of enhancing the attractiveness of Africa as an investment destination – the challenges of small markets and heterogeneous regulatory environments are well known – as well as harmonising payment systems, capital markets and addressing trade barriers are all important elements that have been identified as critical in moving forward.”

Ambassador Albert M. Muchanga, Commissioner for Trade and Industry, AUC

By investing in Africa, African companies are pushing integration on the continent further ahead. Business investments cross borders, taking Agenda 2063 from aspiration to action.

The goal to move Africa towards a Continental Free Trade Area of 54 countries with a total population of more than one billion people and a GDP of more than USD 3.4 trillion will be a global first. The plan is to create a single market for goods and services, with free movement of business people and investments. Regional Economic Communities are making progress, and the planned Tripartite Free Trade Area of COMESA, EAC and SADC is an important step. The bold aims of Africa’s political leaders and policymakers can be best matched by the bold mindset of Africa’s companies in driving closer integration by investing in Africa. Highlights from African companies with a big footprint on the continent show how many expanded from a home base into their region before continuing to invest Africa-wide.

The African Union’s vision of sustainable socio-economic development to transform the continent can only be delivered through Africans’ collective commitment and investment. Higher levels of investments bring Africa’s policy frameworks to life. Channelling African private capital into Africa is a vital part of shaping the continent’s future. Already data from some of the leading African companies investing in Africa gives a positive signal of jobs created and development projects being supported in new business locations.

---

AFRICA-TO-AFRICA INVESTMENT: THE BUSINESS CASE

Fast-tracking Africa’s development also means fast-tracking private investments. Think of a continent that will have the same population as India and China taken together by 2050. Think of a continent with rising middle class, rapid urbanization and that will have the youngest population on earth by 2050. Think of a continent where consumer spending is projected to reach USD 1.4 trillion in the next three years and business-to-business spending to reach USD 3.5 trillion in the next eight years. Think of the continent that accounted for 30% of global business and regulatory reforms in 2016. Don’t look far: Think Africa!

Akinwumi A. Adesina, President, African Development Bank Group

The business case for Africa-to-Africa investment is strongly connected to the continent’s growth and prosperity. Increased foreign direct investment is often linked to economic growth and greater African investments in the region can boost development long-term. Against an uncertain global backdrop and falling commodity prices, investment plays an important role to build economic resilience and shore up the region against external shocks.

African companies are increasingly diversifying the economy and promoting a sustainable growth path. Industrialization is also given a boost as productive inputs are sourced from across the continent and countries add value to these goods as part of regional value chains.

Improving prosperity, in line with the global community’s Sustainable Development Goals, means empowering Africans to fulfil their potential and enjoy economic, social and technological progress. Investment by Africans in their continent is helping to do just that.

Countries, companies and communities stand to benefit from increased investment flows. Investments coming into a country that has a pro-business climate can bring in capital, increase tax revenue and be channelled into infrastructure and development projects. Companies investing in businesses across borders can tap into new markets and clients, helping to meet growing consumer needs among Africa’s middle class and urban population. For communities, investment brings the potential of jobs providing fresh opportunities for the region’s higher educated workforce. It is also linked to a better consumer experience for citizens, with goods and services offered at more competitive prices. Plus with improved financial services on offer, access to capital provides start-ups and entrepreneurs with added momentum to take off. New investments bring knowledge and skills transfer and, with Africa’s growing digitalization, the dots join up to the wider goal of an integrated continent.

---

Greater investment by African companies has the potential to fast-track the region’s integration efforts. As more businesses invest in more countries, the Continental Free Trade Area set out by the African Union moves into sharper focus. As countries trade more with each other, investments by African companies help to consolidate the progress made by Regional Economic Communities and the Tripartite Free Trade Area. To invest with impact, the private sector needs to count on the core pillars of integration working better, from increased trade, improved infrastructure, stronger productive capacity, financial harmonization and freer movement of people. African policymakers have a critical role to play in following through the protocols and treaties that change the realities on the ground.

Objectives of the Continental Free Trade Area

- **Create a single continental market** for goods and services, with free movement of business persons and investments, and thus pave the way for accelerating the establishment of the Continental Customs Union and the African customs union.
- **Expand intra African trade** through better harmonization and coordination of trade liberalization and facilitation regimes and instruments across RECs and across Africa in general.
- **Resolve the challenges** of multiple and overlapping memberships and expedite the regional and continental integration processes.
- **Enhance competitiveness** at the industry and enterprise level through exploiting opportunities for scale production, continental market access and better reallocation of resources.

Regional FDI outlook in Africa

- **Top 10 destination countries for FDI into Africa** accounted for 78% of total number of projects into the region and 91% of the total capital invested.

- Of the top 10 destination countries, only **Egypt, Côte d’Ivoire, Algeria** and **Tunisia** recorded more projects in 2016 compared to 2015.

- **South Africa** maintained a clear lead in number of inbound FDI projects, recording 105 in 2016.

Africa-to-Africa investment

- **FDI and remittances remain Africa’s most important external financial sources.**

- **Intra-African investments** decreased slightly in 2015-16, but overall trend reflects growth.

- **Share of announced greenfield investment projects originating within Africa** was 17%. These investments were expected to create approximately 38,000 jobs in 2015-16.

- **Morocco is increasingly a leading investor in the continent**, with about USD 8 billion of capital investment announced for 2015-16.

- **South Africa** maintained a clear lead in number of inbound FDI projects, recording 105 in 2016.

- **Egypt** retained its position as top FDI destination by capital investment, with USD 40 billion of announced FDI in 2016.

- **Côte d’Ivoire** recorded 33 projects in 2016, an increase of more than one-quarter.

- **Tunisia and Algeria** began to show signs of moderate recoveries in inbound project receipts in 2016.

- Although investment by **South Africa** is lower than in the past, it is a major source of FDI in Southern Africa and the leader in terms of greenfield projects.

  In 2015-16, it was responsible for capital investment of USD 3.6 billion, funding about 60 projects.

- **Kenya, Nigeria and Mauritius** were also important sources of intra-African investment, accounting for 51, 22 and 18 greenfield projects, respectively, over the same period.

**Capital investment by region 2016 (USD billion)**

- **North Africa**: USD 54.3 billion**
  - 184 projects

- **East Africa**: USD 19.4 billion*
  - 143 projects

- **West Africa**: USD 9 billion*
  - 135 projects

- **Southern Africa**: USD 7.9 billion*
  - 112 projects

- **Central Africa**: USD 1.5 billion*
  - 28 projects

AFRICA’S INVESTMENT OBSTACLES AND OPPORTUNITIES

“Across a range of areas, Africans treat non-Africans far better than they treat other Africans. Foreign investors get better incentives and better treatment than national or regional investors. Those carrying non-African passports can move more easily in Africa than those carrying African passports, into most of the countries. Those political and economic anomalies should be corrected... Remember that Africa has the highest returns on investment in the world, and consumer and business-to-business trade is already at USD 3.9 trillion and will rise to USD 5 trillion within the next eight years.”

Sindiso Ngweyna, Secretary-General, COMESA

Many of the obstacles to promoting African investments in Africa are being removed as part of the continent’s integration and prosperity agenda...

Africa as an investment destination has been categorized as high risk. But do the obstacles really outweigh the opportunities the region can offer investors from across the continent? It may be that many of the conditions investors are looking for are not always found in the same place. Uncertain economic and political backdrops can put a brake on investments, along with the big challenges of administrative hurdles and infrastructure gaps. When African businesses themselves are prevented from expanding across borders, private and public sectors need to hold an open dialogue on how to bridge the investment gap. Are companies’ own mindsets blocking investment in Africa – can a fresh look at cultivating boldness, agility and resourcefulness help businesses find new Africa-centered solutions?

The continent’s investment opportunities are very much a reality. More African countries are offering incentives to attract investments, with levels of investment freedom improving across the region. The scope of what it will take to meet Africa’s needs is unprecedented: a growing population, rising consumer demand among the middle classes and access to larger regional markets via the continent’s buzzing big cities and regional hubs. Sectors such as real estate and construction are an increasing focus for global foreign direct investment flows. Alongside the growth potential of financial and consumer services, from food to healthcare as well as manufacturing, it all adds up to a sound investment prospect. Recent data shows that half of the top ten investors in the continent are from developing economies, pointing to an opportunity for African companies to step up and expand their footprint in the region.

African companies can build an entrepreneurial approach to doing business and investing in the continent, drawing on geographical proximity, local knowledge and talent to achieve greater returns. African policymakers can drive Africa’s investment potential by promoting stable policies, smooth regulations, clear procedures and taking on the role of a dependable business partner. At the same time, both businesses and governments need to innovate to make the most of digital advances as more Africans have access to affordable IT services.

12 New African - In conversation: Sindiso Ngweyna (October 2017 edition)
13 See: Lions on the Move II: Realizing the potential of Africa’s economies 2016 (McKinsey Global Institute) and 2017 African Business Outlook Survey (The Economist)
14 World Investment Report 2017 (UNCTAD)
Many of the obstacles to promoting African investments in Africa are being removed as part of the continent’s integration and prosperity agenda, which is moving steadily ahead. That is happening with policy solutions to remove visas at borders and the public-private partnerships tackling Africa’s infrastructure and energy needs. It is happening with regional efforts to scale up industrialization and make access to capital more inclusive for all. Promoting investments in Africa by Africans will move the entire continent further forward.

More African countries are offering incentives to attract investments, with levels of investment freedom improving across the region. 

Doing Business: Africa highlights

Sub-Saharan Africa was the region with the highest total number of reforms in 2016/17, with 83 reforms recorded across all areas measured by Doing Business, a record number for the second consecutive year.

Four African economies are among the top 10 most improved in implementing business reforms in 2016/17: Malawi, Zambia, Nigeria and Djibouti.

Many economies made getting construction permits faster in 2016/2017

Ease of travel across Africa for African passport holders

More African countries are offering incentives to attract investments, with levels of investment freedom improving across the region.
AFRICA-TO-AFRICA INVESTMENT: COUNTRY SNAPSHOT

“The South African government through Trade Invest Africa (TIA), remains committed to the agenda of intra-African investment... Engagements between government, private sector and the business fraternity [are] imperative to the realisation of Africa trading with itself... While opening up conversations to address the energy deficiency, the Continent need not miss out on the digital industrial revolution. This is a new wave that we need to apply our minds on while coming up with solutions.”

Lerato Mataboge, Head of TIA, an Initiative of the Department of Trade and Industry, South Africa

In 2017, 22 African countries were reported to have maintained or improved their level of investment freedom...

The overall picture of Africa-to-Africa investment needs to be broken down by the different investment opportunities offered by host countries across the continent. The political and economic backdrop of the destination market influences investors’ decisions. In turn, how African investment impacts on the economy and development will depend on the investment environment in place. Governments and policymakers in Africa have a front row seat in attracting African companies and inviting them to expand their footprint. Sound macroeconomic management, coordinated fiscal and monetary policies and stable exchange rates matter. The national regulatory, tax, legal and business framework is important.

In 2017, 22 African countries were reported to have maintained or improved their level of investment freedom — a positive trend that should in turn encourage African investors.

Source: World Economic Outlook, International Monetary Fund referenced in The Africa Investment Report 2017

There is a strong correlation between African countries performing highly in the ease of doing business and the top countries for quality infrastructure, with the same seven countries profiled in 2017: Botswana, Kenya, Mauritius, Morocco, Rwanda, South Africa and Tunisia. Three countries — Kenya, Morocco and South Africa — already feature as the top destination markets for FDI into Africa by both capital and project investment.

References:
The Africa Attractiveness Index\(^{20}\) takes into account macroeconomic resilience, market size, economic diversification and governance and human development (alongside business environment and infrastructure). It shows four of the top ten countries in the Index are attracting the highest FDI numbers: Kenya, Morocco, South Africa and Tanzania. The list includes Côte d’Ivoire and Ghana when looked at by FDI into Africa by project numbers. Six of the top 10 countries in the Africa Attractiveness Index are also in the 20 fastest growing economies in Africa\(^{21}\) – Côte d’Ivoire, Ghana, Kenya, Senegal, Tanzania and Uganda.

Six of the top 10 match up to the top 20 most visa-open countries in Africa\(^{22}\) that allow most Africans to enter visa-free or to get a visa-on-arrival: Ghana, Kenya, Mauritius, Senegal, Tanzania and Uganda.

Five companies featured in the report have a home base in four of the top countries in the Africa Attractiveness Index – Mauritius, Morocco, Kenya and South Africa. The companies grew rapidly in their home markets, before expanding, which points to a virtuous circle for Africa-to-Africa investment. National private sector development can, in turn, promote regional business expansion. The numbers across Africa are adding up for investors. African companies can now take advantage of opportunities offered in countries continent-wide: host environments are becoming more business-friendly destinations and infrastructure projects are underway, helping to cut costs and time. Together with closer regional ties, 47 countries on the continent improved or maintained their visa openness,\(^{23}\) showing how countries are becoming more open to each other, in support of Africa-to-Africa investment.

Africa’s Investment Champions

Africa’s companies

The outlook for Africa’s increasing number of large companies is promising. There is room to grow. Data shows that total revenue of large African companies is only one third of its potential and that large firms can make better use of innovation strategies to drive their expansion.25 Opportunities are opening up in new sectors in host economies across the continent and African companies on the ground are able to tap into local networks when taking investment decisions. Africa’s infrastructure projects are getting a much-needed push, helping companies to expand operations, and regional integration efforts on trade and finance are picking up, with new solutions to make business across borders easier, quicker and cheaper.

The African companies championing investments in the continent – whether they operate in the financial or industrial sector, consumer services, media or with diversified portfolios – have key areas in common:

- Clear confidence in the region - confident in Africa’s longer-term future as a region generating economic growth and are putting in the capital to back up their vision.
- Cutting-edge track record - at the cutting-edge of their business with a proven track record in their home markets; regional expansion is a natural next step.
- Capitalizing on their African context – use of local knowledge and networks to capitalize on opportunities ahead of the game to secure greater investment returns.

Case stories from African companies with a substantial footprint26 across the continent highlight where businesses and policymakers can focus to attract investment with impact.

Africa’s companies on the move

Africa has 700 companies with annual revenue of more than USD 500 million each and the total revenue of the 700 totals USD 1.4 trillion. 27% of the 700 companies are multinational corporations - the rest are large domestic companies.

400 African companies have revenue of more than USD 1 billion per year, and these companies are growing faster, and are more profitable than global peers.

Africa’s household consumption and business spending are growing strongly, offering a USD 5.6 trillion in African business opportunities by 2025.

Successful African companies are emerging in sectors such as retail, financial services, and transportation services.

African companies should look for opportunities in six sectors: wholesale and retail; food and agri-processing; health care; financial services; light manufacturing, and construction.

24 Lions on the Move II: Realizing the potential of Africa’s economies 2016 (McKinsey Global Institute)
25 Ibid.
26 AfDB ‘Africa-to-Africa Investment’ company questionnaires; see page 31 for a full list.
“Investing in Africa is a long term project. If you are thinking of the short term, you shouldn’t invest in Africa at all. But it’s a very good place to invest in... Anybody who doesn’t invest in Africa will subsequently regret it... All these challenges that we are facing [as a continent] are not permanent challenges. They are temporary and they will go away. But you can only benefit if you are in line, which means you are already here.”

Aliko Dangote
President and CEO, Dangote Group

“Big companies are important. Companies that have a market capitalisation of one billion dollars and more... You need the big companies because they have a big opportunity to do things, and you need those big things to be able to move the rest of the small and medium-scale enterprises... To create that we need to enable trade to be possible across borders, because it is when companies can trade beyond their local country that they have the capacity to become bigger.”

Ade Ayeyemi, CEO, Ecobank Group
Tailoring flexible business models

African companies that have a large regional footprint are tailoring their business models to be more relevant to the conditions of local markets into which they are expanding. They operate across a range of activities and locations to manage risk and returns effectively. Through their vision of driving prosperity in Africa for more Africans, companies focus on contributing to socio-economic development in the countries and regions where they invest.

African policymakers can boost investment efforts by improving the business environment, reforming procedures to cut time and costs, and also simplifying and updating access to information. Having a strong, open dialogue between regulators and investors on their needs, from infrastructure to information technology, can also catalyze investment flows.
Attijariwafa Bank

“**There is a new look towards Africa.** We are continuing to unite all our energy to promote economic development on our continent. The priority is to invest in countries with a high potential for growth, in particular East and Central Africa, and strengthening economic cooperation across the main regions of our continent, from North to South, East to West.”

Mohamed El Kettani, President Director General, Attijariwafa Bank

**Investment facts**

The bank is the number one group in the Maghreb region and in WAEMU, and is a key player at the heart of CEMAC. It has the largest distribution network in Morocco and the most dense network in Africa with 4,236 branches. The bank continues to focus on mobilizing its overall resources to support the African continent.

**Investment story**

Attijariwafa Bank’s vision to expand across Africa was tied to its goal to support the continent’s socio-economic development, bringing together partnerships and exchanges, as in its International Africa Development Forum. Through adapted products and services the bank aims to support small, medium and large companies to become more competitive.

**Highlights**

- Developing excellence across activities in the home market. From banking to finance and insurance, the bank built up key sector experience before expanding.
- Building a profitable, dynamic business model across subsidiaries. Synergies across trade, finance, investment, retail, insurance helped to generate new business.
- Breaking down a development vision into operational efficiency. The bank focused on key delivery mechanisms: HR, allocated budgets, prioritization and governance.
- Driving economic integration and inclusiveness. With its International Africa Development Forum, it aims to drive economic and social inclusion in the region.

**Investment lesson**

“The development of the banking sector at the African level plays a key role in the mobilization of intra-African investment: improving the perception of country risk, accompanying economic operators in discovering new investment locations, financing growth.”

With its wider vision, the bank promotes a strong governance model in its operations to support its strategy across Africa and drive public and private sector ties at country level.
KCB Group

Investment numbers

- Total assets: Ksh 595.2 billion
- Total equity: Ksh 96.5 billion
- Net interest income: Ksh 47 billion
- Profit after tax: Ksh 19.7 billion
- 12.3 million customers
- 7,192 employees
- Founded in 1896 and listed on: Nairobi Securities Exchange; Dar es Salaam Stock Exchange; Uganda Stock Exchange, and Rwanda Stock Exchange

Investment fact

Since 1896, KCB Group has grown to become East Africa's largest banking institution with an asset base of KES 595 billion (USD 5.84 billion), a market capitalization of KES 105 billion (USD 1.02 billion), and broad regional distribution in seven countries: with over 265 branches, 13,562 agents and 962 ATMs.

Investment story

KCB’s vision was to drive East Africa’s economic journey and be part of a wider purpose supporting progress not only for customers and partners but uplifting more communities. This led to the bank taking advantage of geographical proximity, opportunities in host economies and regional market access, including operating in challenging environments.

AFRICAN FOOTPRINT

7 countries; home base in Kenya

Highlights

- Looking at timing, footprint and business strategy for different markets. To build market share, the bank identified needs to gain customer and regulator support.
- Promoting diversity across the business portfolio. To gain a firm footing in different markets, the bank used its diversity and spread of channels to build client access.
- Setting up a seamless client experience across boundaries. The one-branch banking platform lets customers use services in other locations as if from their main branch.
- Being part of East Africa’s regional integration. As customers moved into cross-border trade in the region, it travelled with them providing services in new markets.

Investment lesson

“One size does not fit all the markets in the region and a clear understanding of which approach would work for the different markets led to the success.”

To be relevant to local contexts, the bank adopted a clearly differentiated approach to each market and customer segment across the region from that established in the home market.

“...we sit at the epicenter of shepherding Africa’s economic transformation agenda... We don’t go to countries for the sake of growth – we follow our trading partners in order to enable their businesses and bank their value chain... The bank is moving toward becoming a financial technology company, where we see this proposition as the next frontier for our growth and the best bet in deepening financial inclusion.”

Joshua Oigara, Group CEO, KCB Group

40 AfDB ‘Africa-to-Africa Investment’ company questionnaire: KCB Group Plc
“Nation Media Group’s expansion is in line with our strategy to consolidate and grow the business across the African hub through access to markets with significant potential such as the youth and female populations across the region.”

— Clifford Machoka, Head of Corporate and Regulatory Affairs, Nation Media Group

**Investment numbers**

- Market capitalization: Shs 17.5 billion
- Total equity: Shs 8.7 billion
- Profit: Shs 2.5 billion

- Founded in 1962 – largest independent media house in East and Central Africa with operations in print, broadcast and digital media
- Group and staff received 14 journalism awards in Kenya, seven in Tanzania, one in Rwanda and nine in Uganda in 2016
- 20 media brands in four countries
- 26 million digital footprint
- 17 million social media followers

**Investment fact**

The Group’s Digital Division grew by 14% in 2016 and two Group products received top awards at the 2017 African Digital Media Awards. This is in line with the Group’s strategy to drive revenue and innovate across platform content, video, entertainment, music, agriculture, business and economic data, fashion and lifestyle.

**Investment story**

Nation Media Group’s vision to tell the African story from an African perspective led it from a successful home base in Kenya to expand across East Africa, building content and coverage on the latest socio-political-economic issues. In moving into new markets, the Group helped to shape the regulatory environment by focusing on press standards and quality journalism.

**Highlights**

- Creating a strong media brand in their home market and regionally. For new audiences to accept products, the Group invested in building its image over time.
- Using a detailed growth strategy to match products to audiences. Knowledge of the media landscape meant that innovative options were targeted to each country.
- Consolidating key investments to drive potential for future growth. The Group invested in overhauling print products and expanding a regional fibre optic network.
- Taking forward strategic regional partnerships and acquisitions. To drive brand quality and audience growth, the Group invested in regional stations and studios.

**Investment lesson**

“The opening up of the digital space has also enhanced our route to market across borders, therefore easing our entry in the markets.”

To meet a growing demand, the Group focused on reaching women and young consumers with innovative products and channels and recruited talent to match trends in new media.
Harnessing local talent and skills

The companies driving investments in the continent are leaders in promoting African talent and focus on training the next generation of professionals needed to help businesses thrive. With their unique African background, multicultural and multilingual, the biggest asset for African companies is in the people they hire in the new markets in which they operate. Opening up local channels and networks to support business development has led to empowering teams and using on-the-ground expertise and insights that power their growth.

For policymakers across the region, supporting investment means providing the skills the next generation needs to be active in the labour market, investing in education and vocational programmes. It also means encouraging entrepreneurship by making it easier for African business people to travel, giving them visas on arrival or visa-free entry at borders.
Ethiopian Airlines Group

Investment numbers

- Operating Revenue: Birr 54.4 billion
- Total current assets: Birr 88.8 billion
- Total equity: Birr 25.4 billion
- 13,942+ employees
- Founded in 1945 and operating worldwide for over 70 years.
- Ethiopian has registered an average growth of 25% per year for the past seven years.
- Operates 94 young, modern fleet, of less than 5 years, with 58 fleet on order.
- Ethiopian Aviation Academy is the largest in Africa and is recognized as an ICAO regional Training Centre of Excellence with annual intake capacity of 4,000 trainees.

“Africa is the largest and busiest continent on earth. The biggest national and the most regional economies. Ethiopia has a population of 100 million and it is a gateway to the world. Ethiopian Airlines is only carried 2.57% of the continent’s traffic in terms of throughput. Ethiopian Airlines offers an average of six flights daily to its 55 destinations across Africa.”

Ethiopian Airlines Annual Report 2015/16

“With its strong mission of bringing Africa together and closer to the world, Ethiopian has expanded much needed air connectivity within Africa and with the rest of the world. Ethiopian has been an aviation technology leader in Africa and has introduced many new aircraft and systems to the continent.”

- Ethiopian Airlines Annual Report 2015/16

Investment fact

The Airline created a missing link through its vast African network to 55 cities and 100+ international passenger and cargo destinations, with daily and more flights, and minimum layover in Addis Ababa. It opened a second hub based in Lomé, Togo, in partnership with ASKY airlines and became a strategic partner of Malawian Air.

Investment story

Ethiopian Airlines’ vision was to capitalize on the huge untapped air transport potential and underserved markets in Africa and use its home base and African roots to do this. Bringing new aviation development to the continent and strong partnerships with other African airlines, the airline has been able to grow rapidly and expand its Africa network.

Investment lesson

“Investing in Human Capital – our well qualified, professional and dedicated employees are the main drivers of the airline’s success.”

The airline put human resource development at the centre of its growth strategy, focusing on developing and nurturing Africa’s future leaders, winning awards for best employer.
Standard Bank Group

“Opportunities in Africa exist, but to succeed, an ability to navigate the complexities of emerging markets is required. Our access to local markets across Africa, through our on-the-ground teams and footprint, gives us insight into the nuances of each market and helps us to better understand and identify client requirements.”

---

Investment numbers

- Total assets: R 1,954,290 million
- Total equity: R 179,359 million
- Headline earnings: R 23,009 million

- Founded in 1862, it has 54,767 employees
- 150+ years heritage and voted Africa’s most valuable banking brand (Brand finance) in The Banker’s 2016 list.
- Winner of the “Risk Emerging Markets Dealer of the Year” award 2016, following a strong performance by its team in challenging market conditions.
- It has a strategic partnership with Industrial and Commercial Bank of China (ICBC).
- As at 30 June 2017, it is the largest African bank by assets.

Investment story

Standard Bank’s vision was to promote a strong and stable brand over time to build its reputation with clients, focusing on supporting growth and development across Africa. Alongside the core operations on the continent, the bank’s international presence offers an opportunity to meet client needs outside of Africa helping to do business in the region.

Highlights

- Focusing on Africa with a strong knowledge of local markets. By concentrating on business initiatives in, for and across Africa, it increased its depth of expertise.
- Looking at a long-term approach to growing the business. The bank was patient in looking at affordable African acquisitions before they became profitable.
- Building an on-the-ground presence to take advantage of opportunities. Promoting capabilities, the bank uses local talent supported by experienced African expatriates.
- Developing local expertise and networks to facilitate business. To support clients, the bank built up knowledge of local regulations, legislation and stakeholders.

Investment lesson

“Our strategy has our clients at its centre, and everything we do aims to partner our clients in their growth. As such, our expansion has followed our clients, as we aim to meet their needs as they expand on the continent.”

The bank created a brand that is ranked in the top black-empowered companies in its home country, while taking advantage of market size and opportunities across the continent.
Building local win-win partnerships

As part of expanding their business activities across the continent, African companies have built strong partnerships with governments, regulators and local actors in destination markets. Thanks to collaboration among the public and private sector, businesses have been able to advocate for better investment conditions and secure support in areas such as digital development. Other strategic partners have brought in capital and expertise to the projects.

The continent’s policymakers can inspire greater levels of confidence and promote investment in the economy by showcasing their role as dependable business partners for African investors. By deepening regional integration efforts with neighbouring countries, investors will be able to take advantage of streamlined business transactions across borders.
CIEL Group

"The main driver behind our African expansion is the population and economic growth of the continent, which goes hand in hand with a rise in the middle class and, as such, the demand for goods (such as sugar) and services (such as finance and healthcare). Africa is the lead market for our Group."  

Jean-Pierre Dalais, CIEL Group Chief Executive

Investment story

CIEL’s vision was to go international and diversify its portfolio linked to a strategic expansion strategy based on strong leadership with a proven track record of business success. To manage challenges and risks to investing in the region, the Group promoted partnerships for mutual growth, strong governance and close management to oversee the business.

Investment lesson

“The emerging business environments in which we operate offer incredible growth opportunities. As entrepreneurs, we know that you need a solid on-the-ground presence and sector expertise to be the best at what you are doing. Therefore, we trust our expert sectorial teams to excel in their respective fields while remaining competitive on the global scene.”

The Group’s growth, expanding across borders and into new sectors, was mostly through acquisition. An entrepreneurial attitude runs throughout the entire business and strategy.
Dangote Cement

**Highlights**

- **Setting out clear investment strategies.**
  The company located plants in strategic markets to serve both the host country and the needs of neighbouring countries.

- **Targeting research and feasibility studies.**
  Quality research meant it could lead on costs and quality by identifying markets with smaller-scale, less efficient operations.

- **Engaging and negotiating with governments.**
  Cooperation with governments led to negotiating on terms and removing legislative bottlenecks blocking investments.

- **Nurturing a proactive and capable team.**
  A strong team in the home and intended market was set up to monitor the process and prepare sound reports at each stage.

**Investment lesson**

“Benefiting from competitive pricing, tight cost controls and investment incentives in the form of tax holidays, our strong cash generation in Nigeria funded our expansion both inside our home country and beyond its borders into key African markets where we are building new capacity that will serve the needs of Africans for the coming decades.”

---

**“Africa will need considerable investment in infrastructure and housing as urbanization increases and economies diversify... towards manufacturing, retailing and services... younger, more affluent and more mobile populations will also increase demand for property... these drivers will see... demand for cement increase significantly in the coming years.”**

---

**Investment numbers**

- Revenues NGN 615.1 billion
- EBITDA NGN 257.2 billion
- Invested NGN 136.2 billion across Africa, and created nearly 2,000 jobs
- Capacity 45.8 million tonnes per year
- Sales volumes 23.6 million tonnes
- 16,272 employees

**Investment fact**

Before the company started manufacturing, Nigeria was one of the world’s biggest importers of cement. In 2012, the country was self-sufficient and in 2016 a net exporter.

**Investment story**

Dangote Cement’s vision was to support African countries to become self-sufficient by producing one of the world’s most basic commodities and establishing efficient production facilities in strategic locations close to key markets. The company prioritized trading within West Africa, taking advantage of regional markets to offer a product free of import duties.

---

68 As of 31 December 2016, Dangote Cement Annual Report 2016
70 Dangote Cement Annual Report 2016
71 See page 31 for a full list.
72 Dangote Cement Annual Report 2016
"Public and private sectors need to cooperate closely to unleash the power of Africa’s human and financial capital to bring this pan-African vision to reality. These have been the core driving force of the success story of Ecobank’s pan-African growth strategy."

— Mareme Mbaye Ndiaye, Chief of Staff to the Group Chief Executive, Ecobank Group

**Investment story**

Ecobank’s vision was to create a pan-African force in banking and take advantage of regional integration opportunities, at the same time driving financial inclusion across the continent. This led to the bank adopting a diversified business model, from a wholesale business in West Africa to a balanced portfolio of banking activities across markets and business lines.

**Investment lesson**

“The defining characteristic of Ecobank is that, with African blood coursing through its corporate veins, where others see risk, Ecobankers see opportunities.”

The bank, instead of avoiding challenging country backdrops, moved ahead with operations in uncertain political and financial times, allowing it to expand rapidly and manage its risks.

---

**Ecobank Group**

**Investment numbers**

- **Net revenue USD 2.0 billion**
- **Total assets USD 20.5 billion**
- **Total equity USD 1.8 billion**
- **Pre-impairment income USD 735 million**
- **10 million customers: individuals, SMEs, regional and multinational, financial institutions and international organizations**
- **17,343 employees**
- **1,265 branches and 2,829 ATMs**

**Investment fact**

Incorporated in 1985 with authorized capital of USD 100 million. The initial paid up capital of USD 32 million was raised from over 1,500 individuals and institutions from West African countries. Ecobank currently has a larger African footprint than any other bank with operations in 36 countries across the continent.

**Highlights**

- Adopting a flexible expansion strategy across regions. Geographical diversification led to strong performance overall in the context of financial and political instability.
- Introducing a ‘One Bank’ strategy with common branding, policies, processes and technology across the network, with risk, finance and IT functions all centralized.
- Attracting institutional investors with strong emphasis on international standards: CSR, IFC Corporate Governance, Equator principles and IFRS accounting standards.
- Securing the support of regulators in moving ahead with digital transformation. This led to meeting growing customer needs by partnering with the public sector.

79 AIDB ‘Africa-to-Africa Investment’ company questionnaires
Checklist for African companies: how to invest with impact

1. **Map out a vision of how to develop** – put in place the right structures to make it work.

2. **Take a long-term approach to investment** – build the idea of returns for the future.

3. **Build a strong domestic base of excellence** – then expand operations outwards.

4. **Capitalize on regional presence** – look to neighbouring markets and opportunities.

5. **Do the research** – map out feasibility, costs and risks; engage with local regulators.

6. **Keep in close contact with business operations** – be ready as situations evolve.

7. **Adapt business model to market conditions** – aim to be relevant to local context.

8. **Use trusted local partners and actors** – develop win-win partnerships over time.

9. **Draw on local skills and resources** – including local knowledge and contacts.

10. **Diversify the business portfolio** – spread business activities to manage risks.

**Investment insights from eight leading African companies** highlight focus areas for the continent’s business and policy community that help Africa-to-Africa investment to thrive.

The starting point in each company’s investment story was having a clear vision that can help grow the business over the long-term. All these companies were strong players in their home markets before reaching out to neighbouring markets and beyond. Getting the investment facts, information and networks up-to-date, both before branching out and once on the ground, proved vital to each company’s successful expansion. Their experience showed that it was the ability to adapt and target services to reach clients in new markets that led to the companies’ investments taking hold. And it was this approach that they combined with bringing on board local partnerships to deliver effective operations. By tapping into talent in the local labour force, companies were able to source the skills needed to grow, while having different business streams helped them to balance risks and returns.
In turn, the companies’ investment lessons show how pro-business policy decisions helped them to expand across the continent and can continue to boost Africa’s investment levels. The companies took advantage of regional agreements to connect to new clients, from free trade zones to harmonized frameworks, cross-border projects and exchanges. Across all sectors, the companies depended on strong infrastructure networks – ICT, energy, transport and logistics – to build their operations. In addition, sourcing expertise from a professional workforce in destination markets helped the companies to expand. The investment stories all highlight policy predictability and stability – being able to count on the host environment to make doing business easier, simpler and clearer. Plus as investors, having the option to travel freely meant an idea was able to go from investment potential to bankable project.

Checklist for African policymakers: how to promote investment with impact

- **Re-energize integration** – see through regional commitments under RECs and CFTA.
- **Expand free trade zones** – look at neighbouring countries, RECs and Africa-wide.
- **Take a regional look at finance** – harmonize regulatory frameworks and platforms.
- **Deliver on regional projects** – cooperate on cross-border plans and open skies.
- **Exchange across borders** – share knowledge and information and promote talent.
- **Invest in infrastructure** – support stronger transport, logistics, energy and ICT.
- **Build right skills** – invest in education and vocational training to match labour needs.
- **Adopt predictable, pro-business outlook** – focus on reforms to cut time and costs.
- **Update access to information** – make administrative steps clearer and simpler.
- **Start with quick-win solutions** – offer visas-on-arrival/visa-free business travel.
Intra-African investments are gaining momentum and offer regional investors opportunities to expand their activities and contribute to the integration of Africa... The Bank is already working with governments to harmonize trade facilitation policies; create regional investment frameworks; remove non-tariffs barriers to foster economic growth, and deepen economic integration...

We will also be kicking off the Africa Investment Forum. Africa-focused and transaction-oriented, it will be a speed investment dating service with a touch of Davos to get the right investors to the right project.

Akinwumi A. Adesina, President, African Development Bank Group
CAPITALIZING ON AFRICA’S INVESTMENT OPPORTUNITY: A FORWARD LOOK

The time to invest in Africa is now. African companies are best placed to seize this unique opportunity to build the continent – from food production to financial products, from road and rail connections to retail, from construction to consumer health care. As global foreign direct investment flows start to decline and a volatile international outlook dominates, Africa’s companies can drive her growth by expanding their continental footprint. The prospect is a long-term one, where private and public sectors can partner to catalyze future investment returns and growth and development, bringing both predictability and stability.

Africa’s integration and investment outlook are closely connected. The factors promoting investments are increasingly present in many of Africa’s countries and Regional Economic Communities, and the Continental Free Trade Area is likely to boost investments still further.

Challenges facing African investors in the continent signpost how policymakers can speed up policies and projects that advance regional integration efforts. A combination of hard and soft infrastructure is needed. Low levels of regional financial integration, compared to intra-African trade, need to be tackled. Regional stock exchanges are in demand and regional payment systems can make it easier to transact across borders supporting investments. Connecting the African airspace and linking up expanding cities, alongside opening up visa policies for Africans travelling to other countries, will encourage investors to make the trip.

‘Africa-to-Africa Investment: a first look’ is the start of a broader conversation, with the first Africa Investment Forum launching in 2018 to fast-track investments in Africa, move beyond the wish list and make deals happen. Tracking data on African companies investing in Africa will be part of the dialogue with a new index profiling the business champions across the continent. It is time to act and capitalize on Africa’s investment opportunities: African companies and policymakers are in the driving seat, steering the latest investment solutions.
