GENERAL PROCUREMENT NOTICE

REPUBLIC OF KENYA

LAST MILE CONNECTIVITY PROJECT

1. The Republic of Government Kenya has received a loan from the African Development Fund to finance the Last Mile Connectivity Project.

2. The principal objectives of this project aimed at extending low voltage electricity distribution system throughout the country to reach counties with low penetration rates. The project is expected to connect an estimated 314,200 customers lying within transformer protection distance, which will result in providing electricity access to approximately 1,571,000 people. The project will result in accelerated economic growth at the micro-economic level in line with the Government’s vision 2030. The procurement activities in the project shall comprise of works for supply, construction and commissioning of low voltage network and Consultancy services for management and supervision of the project.

3. The project includes the following components:
   - Construction of the distribution network including installation of energy meters for the connection of residential and commercial customers.
   - Project Supervision and management consultant to assist Kenya Power and Light Company during the project implementation.
   - Capacity building activities that will include training of Implementing Agencies (KPLC) Technical staff to operate and maintain the distribution system and Re-establishment of KPLC’s Tree seedlings Nursery.
   - Financial audit of the project accounts carried out on an annual basis.

5. Interested bidders may obtain further information, and should confirm their interest, by contacting:
