GENERAL PROCUREMENT NOTICE

1. The Government of the Kingdom of Swaziland has applied for grants from the African Water Facility, the Middle Income Country Technical Assistance Fund and the Climate Resilience Infrastructure Development Facility to finance the Mbabane - Manzini Corridor Dam Feasibility Study.

2. The principal objectives of this project are to:
   - Assess the water resources availability and existing demands within the corridor with special emphasis to potable water supply
   - Optimise an appropriate dam infrastructure to harness the available water resources to meet the prevailing water demands.
   - Address issues of environmental compliance and the development of a resettlement plan for the affected people and
   - Quantify the potential impacts of climate change in the design and management of the project.

The project will be implemented through service contracts to be managed by the Department of Water Affairs within the Ministry of Natural Resources and Energy.

3. The project includes the following components:
   - Feasibility study and detailed design
   - Environmental and Social Impact Assessment
   - Climate change resilience assessment, transboundary issues, PPP and financing strategy
   - Project management, including panel of experts

4. Acquisition of the services of Consultants will follow the Bank's Rules of Procedure for the Use of Consultants. Bidding documents are expected to be available in one (1) month.

5. Interested bidders may obtain further information, and should confirm their interest, by contacting:
