

As spelled out in its 10 year strategy, the Bank will support green growth in Africa by finding paths to development that ease

pressure on natural assets, while better managing environmental, social and economic risks.

Priorities in reaching green growth include building resilience to climate shocks, providing sustainable infrastructure, creating and restoring ecosystem services and making efficient and sustainable use of natural resources. The CIF is an important partner in this urgent undertaking.

“The Bank will measure success

by the lasting changes it brings to the lives of African people.”
