Financing Africa’s Green Structural Transformation

Africa’s priority intrusion for mobilising resources for the region’s economic and social development, has come to recognise that adequate and well-designed finance for climate action is an essential component of the development equation. With its Energy Generation, Efficiency and Conservation Fund (EGECF) to mobilise wide-ranging climate-related resources from a spectrum of public and private sources. Currently, the initiative is actively pursuing the use of three private-sector investment funds: Friedel environment, the El-Khokhli Climate Investment Fund (ECIF), and the Young Sustainable Energy Investment Fund (YSEF).

Resilience and Development

IOM sets aside special funds to increase private sector engagement in resilience, food, and agricultural programs for low-income countries

The IOM has recently set aside resources in its Private Program for Climate Resilience (PPF), Forest Investment Program (FIP), and Program for Scaling-up Renewable Energy in Low-Income Countries (SREP) to promote private sector engagement, and has created web sites which open the door for access to information about the sector and select innovative projects to increase private sector investment.

African rice, the mineral clay, and water resources are the key to solving the problem of Africa’s hunger.

Africa’s rice, the mineral clay, and water resources are the key to solving the problem of Africa’s hunger.

The Global Investment Facility’s (GIF) development challenges (GIDC) has granted $18.1 million to be shared by the ARS to Lunda, Angola, and Mozambique for project concepts designed to help small-scale farmers in the water sector.

Renaissance on the Move

Tomorrow’s energy security and clean energy resources with support of African leaders

On March 14, 2023, a wide range of stakeholders gathered in Durban, South Africa, for a roundtable discussion to explore the need for a new energy strategy to help create an effective, low-carbon, and reliable framework for the country.

North Africa and Middle East easts of IOM green shift for the region

On May 15, 2023, the US $37.6 billion Climate Investment Funds (CIF) go to the North African and Middle East region. It is to provide a new financial and technical support to the region. The plan will receive $68 million from the CIF’s Clean Technology Fund (CTF) and is expected to leverage nearly $5 billion from other donors and private financing. The initiative was also discussed at a Brussels workshop convened by the IOM and World Bank with representatives of Egypt, Jordan, Libya, Morocco, Tunisia in Khartoum, Morocco.

Action Toward Green Growth

Climate for Development in Africa Conference voices new plans to save the world

On March 16, the Climate for Development in Africa Conference in Addis Ababa, Ethiopia, brought together a strong commitment from the participating African leaders, including the ARS, to do whatever it takes to ensure that the program continues to effectively reduce the risks of climate change impacts on Africa.

The African Water Forum: Boosting the water sector through sustainable growth

To reinforce the urgent challenges of Africa’s natural water sector, the forum has been working for several years on investments in Africa’s water sector, such as the ARS, the Arco Bank for Economic Development in Africa, EIF, Global Environment Fund (GEF), and private finance, and has been able to attract $300 million for every $1 invested, mobilizing over $500 million to follow up investments since its inception in 2006.

Building Knowledge, Insights, and Interviews

The Arco-Singapore University collaboration is developing projects that could benefit Africa and the world. The projects should be $100 million, and deliver significant economic and technical viability.
