

## ABOUT THE CIF

With support from the \$8.3 billion Climate Investment Funds (CIF), 72 countries around the world are piloting transformations in clean technology, sustainable management of forests, renewable energy access, and climate resilient development. Of these, African countries are running 1 regional and 38 national investment plans through which AfDB is channeling more than \$2 billion for low-carbon and climate-resilient programs and projects. The AfDB helps countries run projects in all four of the CIF programs: Clean Technology Fund (CTF), Forest Investment Program (FIP), Pilot Program for Climate Resilience (PPCR), and Program for Scaling Up Renewable Energy in Low Income Countries (SREP).

AfDB serves as a key CIF partner and implementing agency, along with its fellow Multilateral Development Banks (MDBs). The AfDB's Energy, Environment and Climate Change Department (ONEC) produces this report every year as part of its contributions at AfDB to support Africa's move toward climate-resilient and low-carbon development. The report highlights AfDB's work to expand Africa's access to climate financing through the CIF, and support for Africa's transformations in clean technology, sustainable management of forests, increased energy access through renewable energy, and climate-resilient development.
